

Features on an iPad to support reading and writing

Accessibility features:

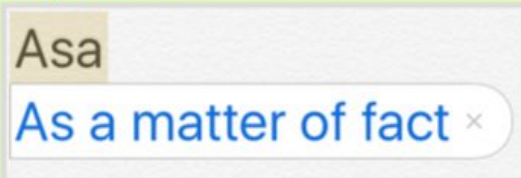

Text Replacement to support spelling

Use Text Replacement to create personalised spelling lists and Auto-Corrections.

Text Replacement to cut down keystrokes (Shortcuts)

Consider using Text Replacement (abbreviation expansion) to help cut down keystrokes. Text Replacement can also help to quickly type repetitive sentences and phrases.

with Typing Feedback activated, each letter you type on the keyboard is spoken aloud as well. You can also use Predictive Text, which suggests word options that you can listen to and choose from to get help with spelling.

Check Spelling

Consider turning on Check Spelling (in General and Keyboards) to alert learners to spelling mistakes. Misspelt words are highlighted with a red underline.

I recieved the parcel yesterday.

Replace Spelling

Tap or highlight the misspelt word to replace it with a correctly spelt word. If you are unsure if the replaced word is the correct one, highlight the word to have it read aloud (Speak).

I recieved the parcel yesterday.

Change the colour filter or invert the colours of the iPad screen. This may make it easier to read:

Dictation: Hold the mic and speak into the iPad.
The iPad converts voice to text instead of having to type.
You will need to edit the text!

Safari Reader

Improve the readability of web pages by removing clutter - tap the black horizontal lines on the left hand side of the URL box.
