2020									46%	73%	100%

#### Context:

- ISCT's A level cohort of 2025 numbered 20 registered students.
- Outcomes improved substantially in 2025 compared with 2024. The proportion of top grades (A\*-A) rose sharply from 5% to 53%, while A\*-B outcomes more than doubled from 40% to 81%. In both years, the school sustained a 100% A-E pass rate\*, with 2025 combining this consistency with a markedly stronger top-end profile, with no underperforming areas.
- STEM subjects are a clear strength, combining high entry numbers with strong top-grade attainment.
- Stable results despite a small cohort, reducing the impact of cohort volatility.
- Positive outcomes regardless of class size, including excellent results in small-entry subjects.
- Broad curriculum success, with strong performance across STEM, humanities, and creative subjects.

- One student completed the **CIPQ (Cambridge Research Project)** and was awarded an A grade. This marks the first time ISCT has supported, mentored, and entered a student for the CIPQ qualification.
- One student in Year 12 entered the **full A Level program** in 2 subjects and obtained A\* grades for both.

2022								26%	51%	92%
2021								42%	63%	92%
2020								44%	68%	95%

### Context:

- Strong overall attainment across the cohort, with **93% of all grades at A-D\***, demonstrating that the large majority of students achieved secure outcomes.
- Over half of all results at higher grades, **with 51% of grades at A-B\***, indicating solid top- and upper-middle performance across subjects.
- **30% of all grades achieved at A level**, reflecting a strong proportion of high academic attainment within the cohort.
- While the proportion of A\*-B grades was lower than in 2024, **overall attainment strengthened in 2025**, with an improved A\*-D pass rate and secure outcomes across the cohort.
- Resilience across a large and diverse entry, with **138 subject entries**, showing that outcomes remained stable and positive despite scale and subject demand.
- **Broadly secure lower-end performance**, with relatively few U grades recorded, supporting the view that students across the ability range were able to access success.
